LinkedIn: <https://www.linkedin.com/in/anjiyarra>

Results-driven Cloud Engineer with 4+ years of experience in IT Support and Managed Services, specializing in AWS cloud infrastructure management, monitoring, and operations. Proficient in cloud cost optimization using CoreStack, proactive infrastructure monitoring with LogicMonitor, and ITSM workflows via ServiceNow. Demonstrated ability to manage multi-client cloud environments, resolve critical incidents, and drive automation initiatives.

PROFESSIONAL SUMMARY

- 4+ years of IT experience with expertise in AWS Cloud Engineering and Managed Services operations
- Hands-on experience in AWS services such as EC2, S3, RDS, IAM, VPC, CloudWatch, Lambda, ELB, Auto Scaling, and Route 53
- Strong experience managing multi-client cloud environments ensuring 99.9%+ uptime SLA compliance across environment
- Expertise in cloud cost optimization and governance using CoreStack including FinOps reporting, tagging enforcement, and anomaly detection across multi-account AWS environments
- Proven experience in proactive infrastructure monitoring and alert management using LogicMonitor and AWS CloudWatch with 30%+ reduction in false-positive alerts
- Strong expertise in incident management, RCA documentation, and ITIL-based ITSM workflows using ServiceNow (L2/L3)
- Hands-on experience in cloud security including IAM policies, least-privilege access, MFA enforcement, CloudTrail auditing, and Security Groups management
- Skilled in identifying and eliminating cloud waste, contributing to \$30K+ in annual savings through rightsizing, Reserved Instance planning, and idle resource cleanup
- Experience with scripting using Bash for cloud task automation and AWS CLI-based operational workflows

WORK EXPERIENCE

Virtusa Consulting Pvt Ltd

Software Engineer (Hyderabad) (Dec 2021 - Present)

Cloud Infrastructure & Operations

- Managed and maintained AWS cloud infrastructure for multiple enterprise clients, ensuring 99.9% uptime SLA compliance across EC2, RDS, S3, and VPC environments.
- Administered IAM users, roles, and policies following least-privilege principles to ensure secure access management across multi-account AWS environments.
- Configured and managed VPC components including subnets, route tables, internet gateways, NAT gateways, and security groups for client workloads.
- Executed cloud resource provisioning and decommissioning as per change requests, following ITIL change management processes via ServiceNow.
- Supported EC2 lifecycle operations including AMI creation, snapshot management, instance resizing, and reserved instance planning.

Monitoring & Incident Management

- Utilized LogicMonitor to proactively monitor cloud and on-premises infrastructure, configured alert thresholds, and reduced false-positive alerts by 30% through fine-tuning.
- Managed AWS CloudWatch dashboards and alarms to track performance metrics (CPU, memory, disk, network) and trigger automated notifications for critical thresholds.
- Handled L2/L3 incident management in ServiceNow - triaging, investigating, resolving, and escalating cloud infrastructure incidents within defined SLA windows.

Cloud Cost & Governance (CoreStack)

- Used CoreStack to implement cloud governance policies, enforce tagging standards, and monitor cost anomalies across multi-account AWS environments.
- Generated monthly FinOps reports identifying idle and underutilized resources, contributing to 15-20% cloud cost reduction recommendations for clients.
- Managed Reserved Instance utilization tracking and Savings Plans recommendations to optimize client cloud spend.

Database Automation & Maintenance

- Developed PowerShell scripts for Backup validation and alerting
- Automated routine DBA tasks using SQL Agent Jobs.
- Implemented database health checks and monitoring frameworks, proactively identifying 95% of performance issues
- Used tools like LogicMonitor and ScreenConnect for monitoring and remote support.

SKILLS

Technical Skills: AWS Services, MS SQL Server, PowerShell, Azure SQL Service, Github

Soft Skills: Collaboration, Communication, Problem-solving, Adaptability

Core Competencies: Cloud Infrastructure Automation, Technical Support

EDUCATION

GVIT, JNTUK

(2016 - 2020)

Bachelor of Technology (B.Tech) in Computer Science

CERTIFICATIONS

- Certified Site Reliability Engineer (SRE) (DevOps Institute - 2025)
- Certified Gen-AI Assisted Engineer (Virtusa - 2024)
- AWS Solutions Architect Associate (SAA-C03) (Amazon Web Services)

PGDIPLOMA IN DATA SCIENCE
